Uninsurable Properties if all other avenues have been explored:

CA FAIR PLAN: *Insurance resource for properties that may be uninsurable:*

The California Fair Access to Insurance Requirements ("FAIR") Plan was created by state legislation in July 1968 following the 1960's brush fires and riots. It is an insurance pool established to assure the availability of basic property insurance to people who own insurable property in the State of California and who, beyond their control, have been unable to obtain insurance in the voluntary insurance market.
